The Integrated Vegetation Management activities proposed in the 2020 Yearly Operational Plan (YOP) for the Commuter Rail includes both mechanical and chemical controls. The mechanical controls (brush and tree clearing, trimming, removal), stump and basal treatments, vegetation clearing from Right-of-Way track drainage ditches, post emergent (non-sensitive areas) and touch up of herbicide is scheduled throughout the year. The ROW pre-emergent chemical application is scheduled weather depending from May 1 through June 30, 2020.

The Right-of-Way (ROW) Maps for each city/town reflect the chemical application zones approved through the five-year Vegetation Management Plan permit issued for 2015-2020. The identification on the maps of private drinking water supply wells remains an ongoing process. Please notify Fair Dermody Consulting Engineers, Keolis and the Department of Agricultural Resources of any omissions and or new private drinking water supply wells.

Please review your mailing address and the ten-digit police department emergency telephone number listed in the Plan and notify us of any revisions. Hard copies of all documents are available upon request, please email [Tim@FDCEngineers.com](mailto:Tim@FDCEngineers.com).
