

Syringe Collection Program Quarterly Report April - June, 2019

The Syringe Collection Program (SCP) at the Lowell Health Department was established in 2019 as a means to educate the community on sharps safety and to respond to discarded syringe pick-up requests within Lowell. The SCP Coordinator actively builds relationships with community organizations to identify locations of frequent needle discard, proactively removes discarded needles in public spaces, coordinates educational activities surrounding safe needle storage and disposal, and supports community clean-up efforts. This quarterly report provides information on the program's progress.

Syringe "Hotspots"

The SCP Coordinator works to identify areas across Lowell that have a high concentration of discarded syringes. These sites are proactively checked for syringes on a weekly basis. In this quarter, the most popular spots were concentrated in the Downtown and Acre neighborhoods.

Fast Facts April - June 2019

2,657

total syringes collected
