

SPREAD LOVE NOT PERTUSSIS

*Are you a family member or close contact
of an INFANT under 12 months?*

- Pertussis is a disease also known as “**Whooping Cough**”
- Infants can catch pertussis through a simple cough or sneeze.
- Studies show that family members and close contacts are responsible for up to 83% of infant pertussis.
- Tdap is a vaccine to protect against pertussis

FREE adult Tdap vaccinations available (19yrs and older)
Fridays from 1-4 pm* at the Lowell Health Department
*Other times available by appointment call 978-674-4308
